I'm back. I saw there were some unanswered questions.

The 22nd Amendment is repealed in 2023 after Republicans take back control of Congress in 2022. Three terms becomes the new standard.

Covid goes away. The vaccine is not mandatory.

The CCP collapses in 2028.

Explain exactly how pardoning Hillary, Obama and Biden is justified in light of what they've done, as opposed to hanging absolutely all of them with the rest of the traitors and pedovores.

Explain how Project Zyphyr both turns out to be 100% real AND gets fully declassified AND results in only 'a complicated relationship' between Israel & America, rather than a full suspension of our alliance, a reversal of their Samson Option nuclear blackmail scheme to US threatening to turn them into a crater at any time, and a full pivot to supporting their regional enemies by providing a third option to them over Russia and the Saudis for arms & first rate military muscle, while the Jews suffer pogroms fucking EVERYWHERE when it's exposed how fundamentally evil they are and how much of a sham their state is, as well as the sheer depth of dirty fucking Sayanim support for said sham state. How does that work? How?

Q was Mike Flynn's idea. His associate ECW was the point man. Q is the reason the 2020 election is a sting. All the other political crimes of the 2010s are also addressed.

The answer to your stock/currency question is: legalese bullshit. There is a currency revolution in 2026-27. Talking about individual firms and their future is more highly regulated.

Trump's handling of Obama and Hillary in 2021 is something that he STILL talks about. Some people give him grief over it but it's generally considered a wise decision. Everyone knows they're terrible people.

Zyphyr is not an extermination program so much as it was a collection program (Pogo and Zyphyr overlap). At least that's the claim. The "JQ" goes mainstream this decade and things become tense between the U.S. and Israel because Israel is allied with China and Turkey.

'Terrible people?'

They rape, kill, process children. They're satanic ritual abusers. Planners of a New World Order for a prison planet of Eurasian-Negroid hive people beneath filthy kikes and shabbos black nobility. The guiltiest pieces of shit on Earth. They don't just need to hang, everything they did needs to be declassified and forcibly pumped over the Emergency Broadcast System in America and through extreme strength pirate radio across the globe so that all of their accomplices are lynched, while every Rothschild, Rockefeller, Pohlad, Payseur manse and all the rest is drowned in napalm and nerve gas. A pardon for them is faggot shit, a puss out. Killing only the middle men makes for rookie numbers. The best we should offer them is full amputation and surgically induced sensory deprivation with a direct neural feed of the word 'GUILT' for the rest of their natural artificially supported lives in prison.

>Israel is allied with China and Turkey.
So, does the US pivot to Assad's Syria and perhaps greater backing for Egypt then? How about the Iran situation, LARP man?

I can come back whenever you want. I spent HOURS on /pol/ in the 2010s. I guess I am the "Jan 2029" guy. It's 5pm, I'm in my office about to go home but this is fun. My staff NCO never did this before, I'm showing him how it works.

I don't think they'll succeed either, but that's what they damn well want to accomplish. And the best way to stop it is to not merely destroy their legacy, but to completely invert it through the hard, evil truth of the absolute worst shit.

You're a fucking larper and I know it. 2024 election will have so much fraud and it will start a civil war. Any USA-Iran war would end with the USA getting rekt and that is coming.

Still STEM. There is also an emerging market in the freight forwarding industry. It's actually something Yang introduces. Basically people sit at home and monitor self-driving trucks and then coordinate disembarkation logistics when it arrives etc. It's a good job.
